Your vaccination protects you against the coronavirus.

The coronavirus can make us sick. Fortunately, there is a vaccination that can protect us well against the virus and the disease.

Perhaps you've already talked to your parents or friends about the vaccination. You can also ask your paediatrician or another doctor about it. They will explain to you exactly what happens during vaccination, so you don't have to be afraid of it.

In our story, Klara wants to tell you about her coronavirus vaccination.

Get vaccinated now!

Ask your doctor or pharmacist for detailed information on getting the vaccine.

Klara is 7 years old. The vaccination against the coronavirus is also available for children of Klara's age.

Klara asks her doctor lots of questions about the vaccination. The doctor answers all of them. Klara now understands everything.

Klara and her parents have decided to get vaccinated. Mummy makes an appointment with her doctor right away.

It's time! Klara goes with her daddy and younger brother Paul to see her doctor.

Klara is now vaccinated and she is given a plaster. She is happy, and so is her daddy. Klara relaxes for the next 3 days.

A week goes by and Klara starts playing football again. She proudly tells everyone about getting vaccinated: “When will you get vaccinated?”
