

My coronavirus vaccination

For all children aged 5
and above

1

Klara is 7 years old.
The **vaccination against the coronavirus**
is also available for children of Klara's age.

2

Klara and her parents have decided
to get vaccinated. Mummy makes an
appointment with her doctor right away.

3

It's time!
Klara goes with her daddy and younger
brother Paul to see her doctor.

4

Klara asks her doctor **lots of questions**
about the vaccination. The doctor answers
them all. Klara now understands everything.

5

Klara is now **vaccinated** and the doctor
gives her a plaster. She is happy, and so is
her daddy. Klara relaxes for the next 3 days.

6

A week goes by and Klara starts
playing football again. She proudly tells
everyone about getting vaccinated:
“When will you get vaccinated?”

For parents:

The coronavirus vaccination protects your child against COVID-19 and possible long-term effects. Read why it is important to have your child vaccinated in the fact check for parents and guardians:
